Summary of evaluation

This report summarizes the evaluation results of a combined flocculation-disinfection and filtration product known by the tradename 'Puribag', under Round III of the World Health Organization (WHO) International Scheme to Evaluate Household Water Treatment Technologies (the Scheme). The Puribag uses a multi-treatment process via the P&G™ Purifier of Water flocculant-disinfectant sachets and activated carbon filter cartridges. Evaluation of the Puribag was based on a desk review of existing data. Based on the evaluation results, Puribag meets WHO performance criteria and is classified as providing *Comprehensive protection* (★★).
