

WATER STORAGE

UZIMA

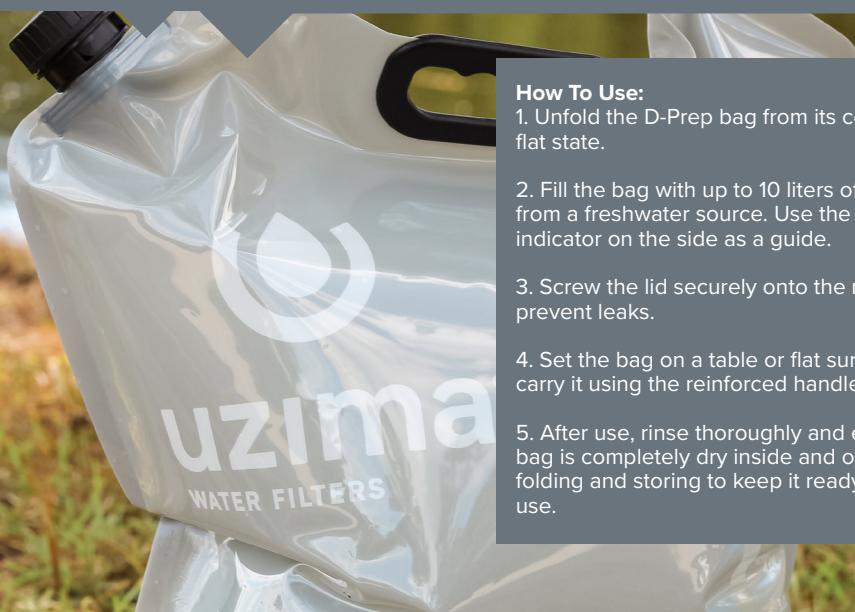

D-Prep Gray Water Bag

When disaster strikes, bulky water jugs are the last thing you need. The D-Prep is your ultra-portable, 10L emergency water bag that folds flat, weighs next to nothing, and is tough as nails. Your go-bag just got a major upgrade.

Key Features

- ◆ Folds flat to fit in any go-bag, because space is everything in a crisis
- ◆ Made from rugged, BPA-free plastic that laughs in the face of punctures
- ◆ No power, no pumping. Just fill and carry wherever it's needed

How To Use:

1. Unfold the D-Prep bag from its compact, flat state.
2. Fill the bag with up to 10 liters of water from a freshwater source. Use the fill-line indicator on the side as a guide.
3. Screw the lid securely onto the nozzle to prevent leaks.
4. Set the bag on a table or flat surface, or carry it using the reinforced handle.
5. After use, rinse thoroughly and ensure the bag is completely dry inside and out before folding and storing to keep it ready for future use.

Why Choose the Uzima D-Prep?

For Every SHTF Scenario — In an earthquake, flood, or power outage, reliable access to water is your top priority. The D-Prep water storage bag is your first line of defense, providing a flexible solution for disaster water storage when infrastructure fails. It's a foundational piece of gear for any serious preparedness plan.

Maximize Your Kit's Real Estate — Forget bulky, rigid water storage containers or a flimsy camping water jug. The D-Prep folds flat, freeing up critical space in your pack for ammo, food, or medical supplies. It's the definition of efficiency, whether you're packing an INCH bag or organizing your vehicle's emergency kit.

The Foundation of Your Water System — This is more than just a portable water tank. It's a foolproof vessel for water transport, designed to work seamlessly with the D-Prep+ Upgrade Kit. Use it on its own for hauling water, or add the UZ-1 survival water filter to create a complete gravity-fed water filtration system without power or pumps.
